FOGSI Infertility Committee

Invites you for

Operative Hysteroscopy workshop

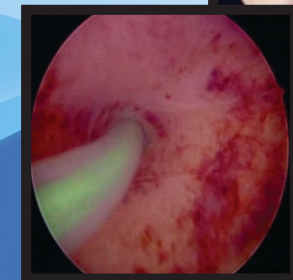

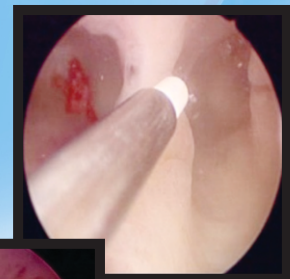

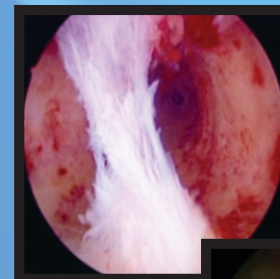

'Adding Hysteroscopy to your practice'

'See one, Do one, Teach one'

Date: 23rd June, 2013, Sunday

Time: 9 AM- 5 PM

Venue: Mahavir Cardiac Auditorium, Surat

Dr Sunita Tandulwadkar
Infertility Committee Chairperson, FOGSI
2011-2013

Dear friends,

We invite you for FOGSI –Operative Hysteroscopy workshop 'Adding Hysteroscopy to your practice'

Gynaecologic hysteroscopy has evolved into a major surgical tool used to treat a multitude of gynaecologic indications in an office set up.

Hysteroscopy has become an important part of the practicing gynecologists' armamentarium for diagnosing and treating common intrauterine problems. With the miniaturization of hysteroscopes many procedures are being performed commonly in the gynecologists' office. In today's robotic age, there is a need to develop patient friendly and highly accurate ways of diagnosis and treatment, with minimal invasion.

There have been a number of important advances in hysteroscopy both in technique and equipment, this workshop aims to update gynecologists on the changes in this field added with practice of the experts.

The purpose of this course is to review the role of hysteroscopy in the management of common gynecologic problems. We will discuss basic hysteroscopy concepts, and will address how to perform routine hysteroscopic surgeries & Do's & Don'ts of hysteroscopic surgeries.

At the end of the day we wish to see that each & every delegate is geared up to start hysteroscopic surgeries in their own set up.

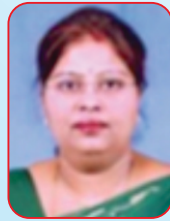

With warm regards...

Dr. Sunita Tandulwadkar
Chairperson
